## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoncuski.

Regarding claim 1, Yoncuski disclose in the patent entitled "Pressure checking apparatus for swimming pool" an elongate pipe housing terminating at a distal end with a threaded nipple and terminating at a proximal end with a shutoff valve and a pressure gauge and the shutoff valve connected to a garden hose (Figures 1-4). Yoncuski does not disclose where the pipe housing is at least 2.5 feet long. However, a change in the size of a prior art device is a design consideration within the skill of the art. In re Rose, 220 F.2d 459, 105 USPQ 237 (CCPA 1955). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the prior art device to include a specified length suitable for a specific application and apparatus would be well within the purview of the skilled artisan.

3. Claim 2 is allowed.
